

## Product Bulletin No: 2203

**Date:** 5/12/2022

**Subject:** Pentair Fleck 5600SXT White End Plug

**Description:**

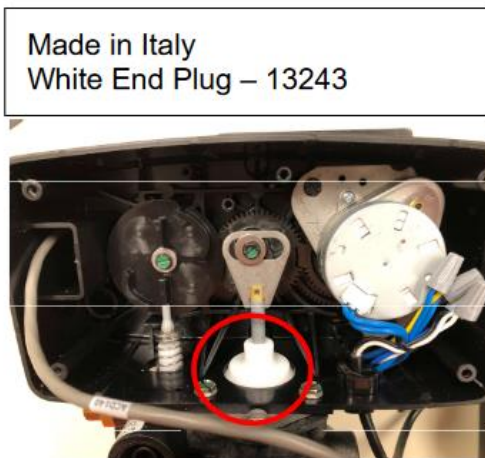

Pentair's Brookfield, WI facility received Pentair Fleck 5600SXT control valves made in the Pisa, Italy manufacturing plant that is using a white end plug rather than the green end plug generally seen on the product. Rest assured, the white end plug provides the same form, fit and function as the green end cap. This is purely an aesthetic difference. (Reference the images below)

**Reason for Change:**

Due to increase in demand, Pentair has been leveraging its Pisa, Italy facility to assist in manufacturing Fleck 5600 SXT control valves and other select, high running part numbers.

**Part Numbers Affected**

- FL56/16PWM-SXT-0.0
- FL56/16M-SXT-0.0

Thank you for choosing Nelsen Corporation.
